MESSAGE

Since ancient times, animal husbandry has been an integral part of rural livelihoods. Gujarat has significantly contributed to animal husbandry activities in India, boasting diverse and genetically rich breeds of livestock such as the world famous Gir and Kankrej cows, Surti, Mahesani, Jafarabadi and Bunni buffaloes. Animal husbandry is also prominent for other livestock like goats, sheep, camels, horses, donkeys, dogs, and poultry.

Gujarat has an extensive network of 552 First Aid Veterinary Centres, 929 static Veterinary Dispensaries, 34 Veterinary Polyclinics, 21 Animal Disease Investigation Laboratories, and 26 Intensive Cattle Development Blocks, along with 1258 Artificial Insemination centers to provide health and breeding services to livestock rearers. The state also has 624 Mobile Veterinary Units that offer free on-call emergency and on-rout animal health services in over 6600 villages.

According to the Basic Animal Husbandry Statistics (BAHS) 2024, Gujarat ranks 4th among the top five milk-producing states, contributing 7.65% to the country's total milk production of 239.30 million tonnes.

The 45th issue of the “Bulletin of Animal Husbandry and Dairying Statistics 2023-24”, prepared by the Department of Animal Husbandry, contains statistical information on the current scenario of animal husbandry in Gujarat. This publication will be useful to the government, corporate, co-operative, and industry sectors. It will also help in understanding market trends, demand, and supply of animal products, and in formulating future State Livestock Policy to meet human requirements for animal proteins.

I appreciate the efforts of all officials involved in preparing this publication.

MESSAGE

Animal husbandry and Dairy Development occupies a special place in the rural economy of the state. Government's Programs like Cattle and Buffalo Development Program, Poultry Development Programs, Fodder Development Programs, Sheep and other Llivestock Development Programmes, Dairy Development Programs are also implemented to boost this sector. Considering the significant contribution of this sector to the total production and income of the state, various schemes have been implemented by the government for its rapid development. People associated with animal husbandry and dairy sector of the state are taking advantage of this.

This 45th report of "Bulletin Of Animal Husbandry And Dairying Statistics : 2023-24 " is being published by the Department of Animal Husbandry which includes important statistics related to animal husbandry and dairying of the state as well as the statistics of various developmental Programmes undertaken by the animal husbandry and dairy sector in the state. It is expected that this handbook will be useful to all organizations involved in planning and development, new entrepreneurs, researchers and students involved in animal husbandry education.

I appreciate the painstaking efforts of Director of Animal Husbandry and team, to bring out such useful publication for betterment of Animal Husbandry sector of the State.

MESSAGE

Animal Husbandry and Dairy Statistics Report is being brought out every year since 1978. It is a very useful publication for formulation of various activities, which is related to welfare of animals and increase livestock production. It is pleasure event that 45th issue of Animal Husbandry and Dairying statistics Report : 2023-24 is being released by the department. In this regard, the efforts undertaken to publish this publication on an annual basis is truly commendable.

This publication comprehensively covers the basic statistics of animal husbandry & dairying and district-wise achievements under various developmental schemes/activities undertaken by the Department of Animal Husbandry in the state. The different notes with the photos of the animals included will be very useful for the purpose of getting information about various schemes and identifying the breeds of different animals.

I hope this publication proves to be very useful to the policy makers, students, scientists, business community, investors and farmers who are the main stakeholders of Animal Husbandry sector of Gujarat.

(Sandeep Kumar, IAS)

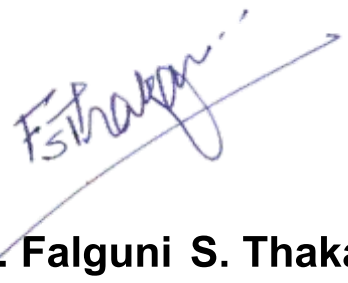

PREFACE

Directorate of Animal Husbandry, Gujarat is publishing the 45th publication of "Bulletin of Animal Husbandry and Dairying Statistics: 2023-24" with reliable database of Animal Husbandry sector in the state.

Directorate of Animal Husbandry expresses its sincere gratitude to the various branches of this Directorate, Central and State Government departments and head of departments of various corporation, who concern with Animal Husbandry Sector. The efforts made by the EDP cell of this department under the positive leadership of Dr. K. A. Vasava, Joint Director (Statistics) is well appreciable. At this moment, when the department is publishing a very comprehensive database of current statistical scenario of livestock sector of Gujarat in the form of "Bulletin of Animal Husbandry and Dairying Statistics: 2023-24", I congratulate to the entire staff engaged for bringing out this publication.

This publication provides information of all fields of animal husbandry sector, which task needed great involvement of sincere and dedicated efforts. I hope that this publication will be useful to administrators, planners, executors, scientists, extension and research scholars engaged in the study of Animal Husbandry sector, industries, foreign investors and very specially to the farmers as a handy source.

I will be grateful to have suggestions towards improvement for the upcoming publications.

(Dr. Falguni S. Thakar)
Director
Director of Animal Husbandry
Gujarat State, Gandhinagar

Date: 16/10/2024

Place: Gandhinagar

From the Desk……..

Department of Animal Husbandry, Gujarat, is publishing the 45th publication "Bulletin of Animal Husbandry and Dairying Statistics: 2023-24" which is consolidated with reliable database of Animal Husbandry sector in the State.

In rural India, Animal Husbandry signifies as the second largest economic activity next to Agriculture. It is an ancestral and easiest profession for skilled, semi-skilled as well as unskilled persons. The livestock sector helps agriculture sector to retain growth in GSDP of the state. It also contributes 3 to 3.5 % to total GSVA at basic prices of the state from Year: 2011-12. Gujarat has a remarkable position in the country as far as livestock health, wealth and development is concerned.

The state is covering the veterinary services like mass immunization, Intensive deworming, castration, Artificial Insemination, SHC campaign, Mobile veterinary dispensary service per 10 villages, Chief Minister's scheme for treatment of all animals at free of cost at Veterinary Dispensaries & Polyclinics. Pashu Arogya mela is the major steps taken by Department for animal health care & extension services.

Various Centrally Sponsored schemes like National Dairy Mission, National Dairy plan, ASCAD, FMD-CP, Fodder development programs, NADRES, RKVY assistance, NMPS are also contributing significantly in the Animal Husbandry sector of the state.

Three tire Dairy Co-operative sector is well established and equipped in the state, which is being taken as role model for other state. The estimate of major livestock products like milk, egg, wool production has been considerably increasing in the last decade, as per the ISS pattern.

The Statistics branch, EDP cell and Livestock Census cell are jointly collected the statistical data, compiled and analyzed it in this useable form. This statistical information on various relevant aspects of livestock sector will be useful in evaluation on socio-economic, environment and food resources. It will be also useful to administrators, Planners, Policy makers, Scientist, Research Workers and developers to improve and achieve more growth in the future.

CHAPTER-2
Livestock Census-2019

D - 1 : 20th Livestock Census-2019 (Breed wise)

The Livestock Census conducted quinquennially is the main source of such data in the country. The first census was conducted in British India during 1919-1920. Since then it has been conducted once in every five years.

The 20th Livestock Census-2019(Breed wise) is completed all over India as per the instruction of the Central Government.

Objectives

(1) The basic objective of the all India Livestock Census is to provide comprehensive information of Livestock & Poultry at global level on uniform and comparative basis.

(2) To provide a frame for other Livestock Production.

(3) To disseminate reliable Livestock Census information in faster Manner.

(4) To provide reliable information which can be useful for planning and policy making purposes and also for researchers and academicians to carry out research and studies.

(5) The basic objective of breed survey is to identify breeding tract of various livestock species in the country as well as in the state.

Utilities

(1) The main advantage of 20th Livestock Census is the age wise, species wise and breed wise data.

(2) Data is used for estimation of Milk, Eggs, Meat & Wool Production of the State.

(3) Data is used for vaccination, castration and artificial insemination programme.

(4) To find out DDP at District, GSDP at State & GDP at National Level.

(5) To find out growth rate in the Livestock Population and Poultry Population i.e. overall growth of Livestock Sector.

(6) To find different livestock indicators i.e. cattle units, density of Livestock Population per Sq. K.M. & number for veterinary institutions required etc.

Scope of Census

(1) The 20th Livestock Census has covered all important breeds of Cattle, Buffalo, Sheep, Goat, Camel, Pigs, Dogs and Poultry as well as information of agriculture equipment used for livestock keeping.

(2) The Livestock Census covers all the 18225 villages; including villages in forest areas, 33 Districts, 248 Talukas, 162 Municipalities and 8 Municipal corporation.

(3) Census Operation include collection of data, online validation, Supervision and Head Quarter level monitoring of field work.

The 20th Livestock census work is completed through tablet PC by the technical person having knowledge of animal's breed and identification of all criteria of breed. Gujarat state started 20th Livestock census work from 07.01.2019 as per the instruction given by DADF, New Delhi and finished as on Dt.20.09.2019.

Government of India published all India 20th Livestock census report as on Dt.25.02.2020. Which is available on www.dahd.nic.in.

This publication would be highly useful for the Policy makers, Planners and Researchers for the development of livestock sector.

2.1 Livestock Population of Gujarat State From 1951 to 2019.

CHAPTER-3
Veterinary Services and Animal Health

D - 2 : Veterinary Services and Animal Health : 2023-24

The animal healthcare sector is crucial for the overall economic growth of Gujarat, and it is imperative to have adequate veterinary services in the state. Currently, there are 864 Veterinary Dispensaries, 552 First aid veterinary Centers, 33 Veterinary polyclinics, 1 High-tech Veterinary polyclinic and One Biological Product Station-Gandhinagar are functioning.

To provide doorstep animal health services through scheduled plan and on call emergency services in a cluster of 10 villages, Government of Gujarat has launched initiative of establishing Mobile Veterinary Dispensary for 10 Villages under PPP mode with EMRI-GHS. Under this initiative, vehicles with facility of GPS which facilitate real-time monitoring from different offices to the Chief Minister's Dashboard.

Availability of Veterinary services to the animals of the farmers by scheduled plan visit of MVD (Mobile Veterinary Dispensaries) in the villages twice in a week with across 6 days in a week in the main village defined on every 10 villages and in emergency case by receiving call at the centralized control and command center on 1962 Helpline.

Based on the scheme of Mobile Veterinary Dispensary for 10 Villages more 127 Mobile Veterinary Units (MVUs) have been established under Centrally Sponsored Scheme with EMRI-GHS by PPP mode.

Mobile veterinary Dispensary for 10 village projects running with 460 vehicles and providing services to more than 5300 Villages. While Mobile Veterinary Unit (MVUs) project running with 127 vehicles and providing services to more than 1300 Villages.

For the control of emerging diseases of livestock and poultry, 18 Animal Diseases Diagnostic Units(A.D.I.O.), 2 Epidemiology Units and one Foot and Mouth typing unit are working in the State. There are number of emerging and re-emerging livestock diseases like P.P.R, Brucellosis, Leptospirosis Glanders, Bird flu, Swine flu and Blue tongue. In poultry, diseases like Infectious Bursal Disease, Ranikhet and Salmonellosis are also more important to control them at present.

The Epidemiology units at state level are required to strengthen with necessary infrastructure facilities like equipment, man power and computerization etc.

National Project on Rinderpest Surveillance & Monitoring Program in Gujarat State:

The Indian Animal Health care industry is in the process of great transformation with an objective to increase livestock production by health care and scientific management. Rinderpest - a cattle plague, was greatest challenge for the globe and created a lot of economic loss in last century, is now globally eradicated. Rinderpest is the first animal disease in India which is eradicated. With concrete efforts, effective vaccine, sufficient inputs, etc, India got a proud of "**Rinderpest free country**". Gujarat has shown all kind of alertness in implementation of the project. Due to active efforts at various levels, no outbreak of Rinderpest disease has been reported after 1988 in Gujarat State.

Gujarat state is located in Western Region of India. It has area of 1,96,024 square kilometers and Livestock population of 96.34 lakh cattle and 105.43 lakh buffaloes as per 20th livestock census. The state has 33 districts and it has adjoining borders with the state of Maharashtra on South, Rajasthan on North and Madhyapradhesh on Eastern direction. State has international border with Pakistan in desert of Kachchh, Banaskantha and Patan. Gujarat is having

large sea coast of nearly 1600 Km. State is richly endowed with Kankrej and Gir breeds of cattle and Surati, Mahesani and Jafrabadi breeds of buffalo.

Rinderpest is the most dreaded viral disease (Plague) of Livestock mainly cattle, buffalo, sheep, goat, domestic pigs and wild ruminants, which had caused average death toll of 10 lacs animals annually during past years in India in early and middle era of 19th Century.

Eradication program had been succeed through the various stages like Mass vaccination, Immune belt scheme, Vigilance scheme, R.P. check post scheme, Follow up scheme, R.P. zero scheme, etc. Rinderpest vaccination has been totally discontinued in Gujarat since July' 96 as per the pathway suggested by O.I.E.. O.I.E. has declare **"Provisional Freedom from Rinderpest disease"** on 1st March,1998, India attained **Freedom from Rinderpest disease** on 31st October, 2003 and India was declared "***Free From Rinderpest Infection***" on 1st November, 2006 after 3 years of zero surveillance conclusions up to 31st October, 2006 .

Presently for preventive measures under RP Surveillance & Monitoring program CBPP & BSE are also included in lines of Rinderpest, to maintain freedom status of the diseases where search and surveillance is the main target.

In 3 international borders district (Kachchh, Patan & Banaskantha) special search & surveillance also carried out throughout year by 3 ADIOs.

Works done under Rinderpest Eradication Program during the year : 2023-24.

1. Village Search and Surveillance : 76306
2. Day Book Inspection : 1795
3. Stock Route search : 3651

3.1 Veterinary Institutions 2023-24.

CHAPTER-4
Cattle & Buffalo Development

D - 3 : Cattle And Buffalo Development

Gujarat State has a noteworthy position in the country as far as livestock wealth and dairy development is concerned. Animal Husbandry and Dairy sector contributes about 5.08 % share to the Gross State Domestic Product.

Gujarat is lucky to have high yielding indigenous breed of cattle and buffalo. Gir and Kankrej breed of Cattle and Mahesani, Jafarabadi and Banni breed of buffalo are well known for their high yielding capacity. Kankrej bullocks are known for their "sawaichal".

Indigenous livestock breeds were developed for their utility under a certain set of agro-climatic condition and have developed some unique traits. Conservation of these breeds is to be done in a way that they may yield the greatest sustainable benefits to present generation, while maintaining its potential to meet the needs and aspiration of future generation. The best way to conserve these resources is within their native environment with the help of livestock owners and non-government organizations.

Emphasis is laid on improving the performance of local breeds through improve germ plasm through selective breeding, improving feeding resources and adequate health coverage. The institutional herd maintain at Research Stations/University/State Breeding Farm/Bull Mother Farm etc. are constantly strengthened both in terms of superior germ plasm as well as modern tools and techniques.

Considerable success has been made in conservation of our native breeds, this has been possible through breeders association and keeping proper records. Central Herd Registration Scheme has been launched by the central government for registration of outstanding animals in their respective home tract.

It has become imperative to form breed wise breeder Association and at present Breeder Association for Banni, Mahesani, Surti and Jafarabadi buffalo as well as Gir cow are working for conservation of particular breed.

Farmers are participating in state milk yield competition and Central Herd Registration Scheme and high yielding animals are provided incentives in terms of cash prizes and certificates. This helps in conservation and improvement of the breeds in their home tract.

A. **Cattle**:

There are three breeds of Cattle viz. Gir, Kankrej and Dangi.

Gir Cattle - Best Milch Purpose breed of India :-

The native tract of the breed is the area around forests of Gir including Junagadh, Bhavnagar, Rajkot and Amreli districts of Gujarat. It is docile in nature. The coat colour of Gir animals varies from shades of red and white to almost black and white or entire red. Forehead is bulging. Long and pendulous ears folded like a leaf. Horns are peculiarly curved. Starting at the base of the crown they take a downward and backward curve and again incline a little upward and forward taking a spiral inward sweep, finally ending in a fine taper- thus giving a half-moon appearance.

Kankrej Cattle - Dual Purpose breed of Gujarat (Milch & Draught)

It takes its name from the name of Kankrej taluka in North Gujarat. Breeding tract is Banaskantha, Mehsana, Ahemdabad, Sabarkanatha, Kheda, Vadodara, Bharuch and Surat. The gait of the Kankrej i.e. "Sawai chal" is peculiar to the breed. Coat colour of the animal varies from silver grey to iron grey and black. Forehead is broad and slightly dished in the centre. Horns are strong and curved outward and upward in a lyre shaped fashion. They are curved with skin to a longer distance as compared to other breeds. Ears are large pendulous and open.

Dangi Cattle - Hilly Cattle of Gujarat (Draught Purpose)

Dangi breed is well known for their excellent working qualities in heavy rain and on the hilly tracks. Native tract is Dang district of Gujarat and Ahmednagar and Nasik Districts of Maharashtra. The animals are adapted to heavy rainfall conditions. The skin exudes an oily secretion which protects from heavy rain. Coat colour with red or black spots distributed unevenly over the body. Animals with inward and also with downward pointing horn tips are also available in sizable numbers. Forehead is slightly protruding.

B. Buffalo :

There are four breeds of Buffalo viz. Jaffrabadi, Mehsani, Surti and Banni.

Jaffrabadi Buffalo - Jaffrabadi is the heaviest of all the Indian breeds of Buffaloes.

It is named after the town of Jaffarabad, port of Amreli district of Saurashtra. It's breeding tract is in and around area of Gir Forest such as, Amreli, Junagadh, Bhavanagar, Rajkot district.

Generally Black in colour and also Copper coloured animals in small proportion. Horns exhibit wide variation, but usually emerge out by compressing the head, go downward sideways, then upward and inward finally forming a ring like structure. It makes eyes to look small - termed as study eye, especially in males. Due to heavy weight, it is also called as "Mini Elephant". They yield appreciable quantity of milk, with an exceptionally high butter – fat content.

Mahesani Buffalo - Mahesani is famous as persistent milker and regular breeder.

The breed is considered to be a cross between Surti & Murrah. Breeding Tract is in and around Mehsana, Banaskantha and Sabarkantha districts of the northern part of Gujarat. Mostly black, a few animals are black brown or brown. Horns are generally sickle shaped with the curve more upward than in the Surti breed and less curved then in the Murrah breed. They are generally bent downward and then take a curve like the horns of a ram. Eyes are very prominent, black and bright bulging from their sockets with folds of skin on upper lids.

Surti Buffalo :

It is named after the town of Surat. Breeding Tract is in and around Kheda, Vadodara, Anand & Bharuch districts of the middle and southern part of Gujarat. The Surti buffalo is lighter in body weight, consume less feed, and produce milk with high fat and SNF content. It is popular with landless, small and marginal farmers. Coat colour varies from rusty brown to silver- grey. Skin is black or brown. Horns are flat, sickle shaped and are directed down ward and backward, and then turn upward at the tip to form a hook. Medium sized animal, brown colour, two white bands below the neck and sickle shaped horns.

Banni Buffalo :

The Name of this breed is evolved from its native tract Banni area of Kutchh District of Gujarat. The breeding tract is in and around Kutch district. The animals of this breed is raised under extensive management system with night grazing. Night Grazing and Once in a day milking are some of the unique features of this breed. Mostly black (95%) in colour as well as brown (5%). Horns are tightly coiled vertically with single to double coiling.

Scheme for conservation and improvement of Cattle and Buffalo :

1. Cattle Breeding Farms: -

The state government has established 4 cattle breeding farms for Gir and Kankrej Cattle to improve its genetic potentials in terms of milk production.

The state Government Farms make continuous affords for improvement of our breeds. Bulls of superior genetic potentials are raised at these farms for breeding. The bulls so reared are supplied

to the state semen centers for A.I. activities and also to the District panchayat, Gaushala and private breeders at nominal cost of Rs.1500 for natural services. The farms also provide basic veterinary services like A.I., first aid, sexual health care, castration and vaccination to the nearby villages. Various extension activities likes Shibirs, Gramsabha, training in animal breeding and management, film shows etc. are also conducted by the farms to impact scientific knowledge to the cattle owner.

2. Milk Yield Competition:-

State level Milk Yield Competition of different breeds are organized to locate high yielding animals to encourage farmers for scientific animal husbandry activities. Winners in the Competitions are given cash prizes and certificates as 1st, 2nd, 3rd and Runner up as incentives. All regular participant also given Rs.1000 as consolation prize. Total target for 2023-24 was 1500 and achievement was 1492.

3. Technical Training Centre:-

Basic as well as Refreshment training program for artificial insemination for livestock inspector, Gopal Mitra, MAITRIs (Multipurpose Artificial Insemination Technician in Rural India) and field veterinarians are organized by department at Technical Training Centre, Morbi.

4. Sankalp Patra Scheme :-

Department of A.H. organizes sexual health camps. The target for 2023-24 was 900 sexual health camps and achievement was 901.

5. Scheme for subsidy for death of Animal/fowl-duck at the time of certain disease/ poisoning: -

The main aim of the scheme is to aid economical help to the animal owner for loss of animal due to certain disease like Anthrax, Rabies, Bird Flu and poisoning like chemical, food, snakebite… so he can purchase the replacement of his lost animal or bird and continue his income generation.

During the year 2023-24, total 234 (animals) applications were sanctioned and total Rs.7.92 lakh compensation were given to Animal owner for the death of their animals.

6. Scheme for subsidy on Interest Subsidy for Establishment of Unit of 1 to 20 Milch Animals Farm (For General/Scheduled cast(SC)/ Scheduled Tribe(ST)) :-

Dairy farming is an important source of constant subsidiary income. The small and poor farmers can purchase 1 to 20 animals as per their need and capacity to maintain. If any bank recognized by Indian Reserve bank sanction loan for any dairy animal cow & buffalo, the beneficiary can get interest subsidy @ 12 % interest on bank loan amount (as per unit cost of NABARD guide line).

During the year 2023-24 total application 1498 were sanctioned for General Category, 54 for Scheduled cast (SC) and 34 for Scheduled Tribe (ST) for subsidy.

7. Scheme for Assistance to Establish 12 Milch Animals farm for self-employment: -

To create livelihood at village level intensive efforts are being made by the State Government to accelerate the development of rural people by implementing Scheme for Assistance to establish dairy farm of 12 Milch animal for self-employment. In this scheme financial assistance for animal husbandry business such as interest subsidy on bank loans received interest subvention on bank loan for purchase of 12 Animal and capital subsidy on shed construction, purchase of Chaff Cutter, Fogger system, milking machine and animal insurance for 3 years. Government use to give

importance to the animal husbandry business at village level, making animal husbandry a pillar of rural employment and thus to achieve the goal of doubling farmers income by 2026.

During the year 2023-24 total application received 2510 out of them 1819 were sanctioned for subsidy.

8. Scheme for Assistance to Establish 50 Milch Animals farm for self-employment: -

To create livelihood at village, sub urban and urban level intensive efforts are being made by the State Government to accelerate the development of people by implementing Scheme for Assistance to establish dairy farm of 50 Milch animal for self-employment.

In this scheme financial assistance for animal husbandry business such as interest subsidy on bank loans received interest subvention on bank loan for purchase of 50 Animal and capital subsidy on shed construction, purchase of Chaff Cutter, Fogger system, milking machine and animal insurance for 3 years. Government use to give importance to the animal husbandry business at village, sub urban and urban level, making animal husbandry a pillar of self-employment and thus to achieve the goal of doubling farmer's income by 2026.

During the year 2023-24 total application received 79 out of them 18 were sanctioned for subsidy.

9. State wide Intensive Castration Program Scheme: -

Castration of male calves will help to control the number of stray animals in the state and provide better care for productive animals. Additionally, it can prevent unnecessary breeding by male animals with low genetic potential for productivity. This will help to accelerate the breeding of animals through semen doses with high genetic quality in the state and this leads to breed improvement. These will help to minimize the problems of stray male animals causing accidents in rural and urban areas.

During the year : 2023-24, total 12497 male animals were castrated and Rs. 500/- subsidy is given to the animal owner.

CHAPTER-5
Poultry Development

D - 4 : Poultry Development In The State

1. Introduction

Poultry Farming is a type of animal husbandry which rears domesticated birds for production of meat and eggs. Chicken are the most commonly raised fowl due to more consumption and better profit and comparatively less investment. Chickens which are raised for eggs are known as layers while the ones reared for meat are known as broilers. Due to the physiological adaptability of poultry, Poultry farming is popular across the globe and is often considered synonymous to chicken. The ability of initiating the business at low rate of investment accentuates such kind of farming.

2. Basic Structure of Poultry Sector

Poultry sector in Gujarat broadly divided into two subsectors – one with a highly organized commercial sector and the other being unorganized The unorganized sector also referred to as backyard poultry plays a key role in supplementary income generation and family nutrition to the poorest of the poor. The needs of organized and unorganized sectors are very different.

2.1 Organized Poultry farming as a Private Enterprise

Poultry sector- especially commercial poultry sector- is flourishing in certain pockets of Gujarat, where amenable environment exists, along with backward and forward linkages. This industry has matured largely due to the initiative of private enterprise with minimal government intervention, appreciable indigenous poultry genetics capabilities, and significant support from veterinary health, poultry feed, poultry equipment, and poultry processing sectors. Poultry sector is now in current state where commercial production is the norm of the day with a number of technologies intervention. Elevated mutton prices, religious restrictions on beef and pork, and an inadequate availability of fish outside coastal regions and changing food habits are few reasons for development of organized poultry farming in Gujarat State.

The organized poultry farming can be classified in two segments-

(1) Broiler Farming :

Following commercial improved hybrid varieties of broilers are very popular in Gujarat state –

1. Vencobb-400, Vencobb-430
2. Ross-308
3. Hubbard
4. Lohmann Broiler

(2) Layer Farming :

For Layer poultry farming following Commercial White Leg Horn varieties are very popular in Gujarat state.

1. Babcock
2. Bovans

2.2 Unorganized Rural Backyard Poultry farming

The rural backyard poultry systems play a pivotal role in achieving nutritional security in rural areas. In village poultry systems the production of poultry meat and eggs is extremely efficient in terms of feed and water inputs. These nutritious products can supplement household grain-based diets. Family poultry have a special place as they are under the control of women, require low investment, assist in pest control and provide manure for fertilizer. Improvements in their production can meet the nutritional demand in the household and in the community by increasing their social standing and financial autonomy.

To give support to this sector in rural areas of Gujarat state, Department Animal Husbandry has Intensive Poultry Development Block, District Poultry Extension Centre and Chick rearing centres for various poultry development Scheme. 'Poultry Development' assistance in form scientific training and 25 RIR/Kadakanath (6 to 8 week chicks) along with 70 to 80 kg poultry feed is provided to beneficiaries from weaker sanction (BPL families), SC, ST and 40 RIR bird (6 to 8 week chicks) along with 130 to 140 kg of poultry feed is provided to Divyang peoples of societies.

To promote backyard poultry farming in state, the Department of Animal Husbandry maintains the parent stock of Low Input Birds like Rhode Island Red at IPDB, Ahmedabad-Makarba & Vadodara and Kadaknath at IPDB, Dahod & Ahmedabad-Makarba.

Anand Agriculture University, Anand is maintain parent stock of low input indigenous poultry breed of Gujarat named as "Ankleshwar".

The Day old chicks are provided to rural farmers for backyard poultry farming at subsidized rate in all above government institute of Gujarat State.

2.2.1 Breed Characteristic of Low Input Birds

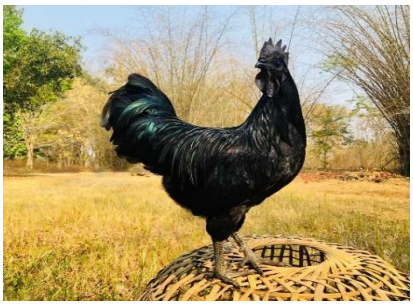

Rhode Island Red :-

Dual purpose Rhode Island Red (RIR) breed is very popular in India. The eggs of RIR breed is brown in colour like desi eggs. Its chicken is very delicious. The breed is considered excellent for producing eggs and meat. This breed can live well in cold humid environment and hilly region. Their feathers are bright red or brownish red in color. Some birds have black tail and wing feathers. The body is square in shape with wide hips and a flat back. Adult chicken's weight around 4.0kg and hen's 3.0kg.

Kadaknath :-

The origin of this variety is Madhya Pradesh (India). This type of bird is known as "Kalamasi" because its flesh is black color. Kadaknath lays light brown eggs. The comb is black in color and have a thick stripe on the back. Palate, fringe and tongue are purple in color. Must of the internal organs are also dark in color. The black color seen in various parts of the body is due to a pigment called "Melanin". The meat is very tasty. Birds have good disease resistance.

Ankleshwar :-

The origins of this breed is the state of Gujarat (Bharuch and Narmada districts). This breed is also known as Gaurani, Gamathi and Deshi. This variety is named "Ankleshwar" after the name of Ankleshwar city in Bharuch district of Gujarat. The plumage of the birds is yellow or golden yellow with black striped dots or white with golden or black dots. The skin has yellowish colour. The color of the legs is yellow or black. The color of the earring is white. There is a single or rose type red comb. Annual eggs production is 80 to 90. It is the robust bird for backyard poultry farming.

CHAPTER-6
Sheep, Goat and Wool Development

D - 5 : Sheep, Goat and Wool Development

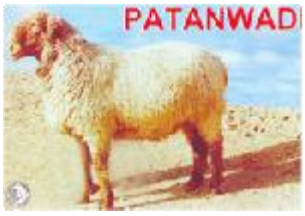

Sheep population is 17.87 lakh in Gujarat as per 20th livestock census. More than 70% of sheep & goats are reared by small/marginal farmers and landless labors. Major portion of sheep population is in Saurastra and North Gujarat. Sheep and wool development activities of the state have significant improvement, because the population of the sheep is almost 6.65% of the total livestock population in the state and it has tremendous scope for further expansion.

There are six District Extension Centers, five Intensive Sheep Development Projects, one Large Scale Sheep Breeding Farm and two Migratory Sheep and Goat Service Centers are being run in the state, which provides technical and extension services like Treatment, Vaccination, Drenching, Dusting, Castration, etc. to the sheep and goat breeders of the state. Also, there are four Sheep Breeding Farms in the State. The GSWDC provides all necessary marketing facilities for the sale of wool and other by-products.

BREEDS OF SHEEP

There are three breed of sheep viz; Patanwadi, Marwadi and Panchali (Dumba or Dumma) in the state.

PATANWADI

The breed is well known for Roman nose, brown to dark brown color of face extended up to the neck and all four legs below knee and hock. It possesses pendulous abdomen. The ears are twisted, tubular and of medium length. Flower appendages are quite common. The breed is polled.

MARWADI

The breed resembles black-headed Persian sheep but is smaller in size and has good fleece. As Marwadi breed is hardy useful in migration during frequent drought periods.

PANCHALI

Panchali is a dual purpose sheep reared for milk & meat in Panchal area of Gujarat.

Animals are large in size and have long legs and excellent migration ability. Coat color is white. Head or facial parts are black, blackish brown, brown and light brown in color. Ears are long and pendulous. Tail is long. Udder is well-developed. Milk yield ranges from 0.4 to 1.2 liter/ day. Animals attain 18 to 20kg body weight at 3 to 4 months of age. Adult weight varies from 53 to 82kg in males and 32 to 73kg in females. Wool is coarse and annual production is nearly one kg.

Programs & Schemes

Sheep Breeding Farms:

Traditional breeder propagate their sheep stock by selective breeding using their own collective ancestral wisdom. Department of Animal Husbandry has adopted selective breeding for improvement in Patanwadi and Marwadi sheep. Improved pure breed ram of higher genetic merit is

available at four Sheep breeding farms and distributed to breeder. The detailed information of these are under.

Status of various sheep farm of Gujarat			
Sr. No.	**Name of Farm**	**Under**	**Breed**
1	**2**	**3**	**4**
1	Sheep Breeding Farm Morbi, District-Morbi	Department of A.H.	Patanwadi
2	Sheep Breeding Farm Naliya, District-Kachchh	Department of A.H.	Patanwadi
3	Sheep Breeding Farm Morbi, District-Morbi	Department of A.H.	Patanwadi , Marwadi & Panchali (Dumba or Dumma)
4	Sheep Breeding Farm Jasdan, District-Rajkot (GSWDC)	GUSHEEL	Patanwadi , Marwadi & Cross breed

Conservation & propagation of pure breed is main object of sheep farm. The pure breed adult ram produced on these farms are being distributed to breeder at nominal cost. The ram produced at breeder flock are also certified for breeding purpose. Certification and distribution of ram is through Sheep Service Centers of Intensive Sheep Development Projects (ISDP),Migratory Sheep-Goat Service Centers and Sheep Extension Centers. Training is being given to Maldharies for scientific sheep breeding & rearing.

Goat development:

Goat population in the state is nearly 48.67 lakh as per 20th Livestock Census.

BREEDS OF GOAT

The main breed of Goat in Gujarat are Kachchhi, Mahesani, Surati, Zhalawadi, Gohilwadi and also Kahmi goat is newly registered breed in Gujarat.

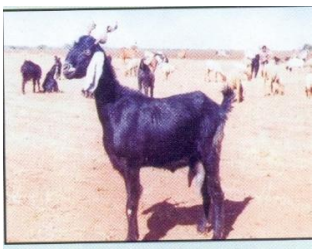

MAHESANI

The Mahesani goat breed derives it's name from the origin place called 'Mehsana' in Gujarat.It has long and shaggy hair coat, black body with white spots at the base of ear. Spirally curved horns going upward and backward. Well-developed udder with large conical teats-Ave. milk yield 1.32 kg. The Mahesani goat is widely spread and distributed in Banaskantha, Palanur, Gandhinagar, Ahmedabad and nearby areas in varying intensity.

ZALAWADI

The Zalawadi goat is a multi-purpose breed of domestic goat. It is used for milk, meat and fiber production. Actually, the breed is from the Surendranagar, Rajkot regions of Gujarat state in India. It has Black body with long and course hair; long and wide leaf like ears; Well developed udder with large conical teats. Ave. Milk yield is 2.0 Kg

GOHILWADI

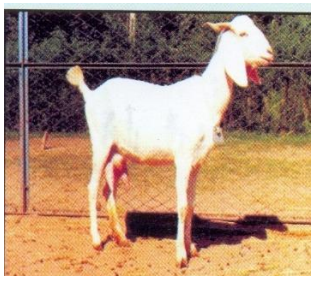

The Gohilwadi goat is distributed mainly through Amreli , Bhavnagar and Junagadh districts of Gujarat state in India. It is used for milk, meat and fiber production. It has Black body with long and coarse hairy coat; Tubular ears & Ave. Milk yield is 1.7 Kg

KACHCHHI

The breed is native to the Kutch district of Gujarat. And the Kachchhi goat breed derives its name after the **'*Kutch*'** district. Body is black with few white spots. Long and coarse hair coat. Long and broad ears. Ave. Milk yield is 1.8 Kg

SURTI

Surti goat is one of the best dairy goat breeds in India. Name of the breed derives from the place called **'*Surat*'** in Gujarat state of India. The Surti goat is distributed in surrounding areas of Surat, Vadodara and Panchmahal districts of Gujarat state and also Nasik of Maharashtra State in India.

It has white body colour, small horns going backward, Medium size ears, well developed udder. Ave. Milk yield is 2.5 Kg

KAHMI

This goat is native to Saurashtra region of Gujarat. Coat color is unique - neck and face are reddish brown while rear abdominal part is black, locally called ***Kahmi*.**

Ears are long, tubular & coiled,Wattles are present in majority of goat. Forehead is convex. Horns are directed upwards and backwards. These goats are used both for meat & milk. Average daily milk yield is about 1.7kg. Adult body weight is 56kg in males and 48kg in females. Average liter size is 1.4.

Status of various sheep farm of Gujarat			
Sr. No.	**Name of Farm**	**Under**	**Breed**
1	**2**	**3**	**4**
1	Goat Breeding Farm – Mota jampura Dist. Banaskantha	Department of A.H.	Mahesani
2	Goat breeding Farm - Morbi	Department of A.H.	Zalawadi
3	Goat breeding farm - Morbi	Department of A.H.	Gohilwadi
4	Goat breeding farm-Naliya. Dist. Kachchh	Department of A.H.	Kachchhi
5	Goat breeding farm-Kondh. Dist. Bharuch	Department of A.H.	Surti

Conservation & propagation of pure breed is main object of Goat farm. The pure breed adult buck produce on these farms are distributed to breeder at nominal cost.

Goats are reared and bred by selective breeding at the farm. There is one National Goat Demonstration unit functioning at Morbi, which provides suitable demonstration for the local goat breeder. Goat is domesticated for meat and milk.

Subsidy is given for goat unit (10+1) to Scheduled Caste people, Scheduled tribe female and General category people for the establishment of Goat units.

Goat can thrive in areas where fodder resources are limited where milch cattle do not thrive. The goat has ability of thrive on a class of fodder on which other animal starve to death. Goat is considered as poor man's cow. Economic efficiency of goat over sheep is well documented. It is found that goat is 160% more economic than sheep and 130% more economical than cattle on zero input basis. Goat has remarkably high feed efficiency both for meat and milk production.

CHAPTER-7
Other Livestock Development

D - 6 : Other Livestock Development

Horse Development:

Kathiawadi, Marwadi and Kutchhi-Sindhi are three important horse breed of Gujarat. Kathiawadi horses are found mostly in Saurashtra region, Marwadi horses are found mostly in north Gujarat and Kutchhi-Sindhi horses are found mostly in Kutchh. Animal Husbandry Dept. of Gujarat State has undertaken a program for creating awareness amongst the horse keepers regarding scientific horse keeping. For the preservation and propagation of valuable germplasm of Kathiwadi horse, Department of Animal Husbandry, Gujarat state has established two horse breeding farms one at Inaj, Ta:Veraval. Dist.: Gir Somnath and another is at Hingolgadh Ta:Vinchhiya Dist.:Rajkot. Horse breeding farm for Marwadi breed is established at Chanasma Dist.-Patan. Breeding and other technical services are provided to the horse keepers through 12 Stallion Service Centers. In Gujarat state, Kathiawadi and Marwadi horse care taker association organizes exhibition and competition of horses in collaboration with the State Govt. Horse Shows are also organized by Horse Society which are selected by government with financial assistant by the State Govt. The good horses can be identified during such competitions.

Donkey Development:

Generally two types of domesticated donkeys are seen in Gujarat i.e. White coloured and Ash coloured (Bhagra).

HALARI DONKEY

White colored donkey is known as Halari Donkey which breed now register. Native to Saurashtra region of Gujarat.

These donkeys are white in colour. Muzzle and hooves are black. Forehead is mostly convex. Halari donkey has a strong built and large size with an average height at wither of 108cm in males and 107cm in females, and average body length of 117cm in males and 115cm in females. These donkeys are very docile in temperament, and are used as pack animals during pastoralist

migration and for transportation as donkey cart. Halary Donkey can walk approx. 30-40 km in a day during migration

Ash colored donkeys have black strip on the back. This black strip of 9-10 inches extends vertically from withers to the shoulders on either side. This strip extends right from the neck base up to the tail base. They are short with long ears that stand erect.

In Gujarat, a fair organizes every year at 'Vautha' in Dholka Taluka, Dist.Ahmedabad. This fair is very famous for sale of donkeys and also for race competition of donkeys.

Department of AH is established a donkey breeding farm for the purpose of pure bred white Donkey production at Chanasma Dist-Patan.

Camel Development:

Camel is an important component of desert ecosystem. It possesses many unique qualities which make it distinctly superior than other domesticated animals in the hot and arid desert ecosystem. In the Indian dry land farming systems, the camel is a major source of power for transport and agricultural activities. It also provides milk, hair, hide, manure, bones and meat to the societies.

	
Kachchhi	Kharai

Gujarat is best owed with Kachhchhi camel. Kachcchi breed is very old and pristine breed and lightly built compared to Bikaneri. Its body coat is light brown in colour. It has thin neck, small closely set mouth with small ears and prominent eyes. Muzzle is barred. Kachchhi camels are good milk producer and can pull weight of 1600 kg with speed of 5km/hour. It works with 0.75 to 1.32 HP energy. For pulling 1.4 -1.8 MT load for 4 hours a day, its dry matter requirement is 1.8 -2.00% of body weight.

Gujarat state has a camel breeding farm located at Dhori, Dist: Kachchh for the conservation and propagation of Kachchhi breed. Good camels are provided to the army and police force and also to private farmer for camel cart. Efforts are made to conserve breed characteristics of camels on these farms. Establishment of Camel Breeder's Association named-Kachchh Unt Ucherak Maldhari Sangathan is organized.

Recently a new breed of Camel in Gujarat "Kharai" is registered by NBGAR, Karnnal. Kharai camel are able to survive in dual ecosystem (sea water and on desert land) of kachchh region. Kharai camel also swimming in water, its body coat is mostly brown white mix (charvo) and dark black. It has large head, thick neck, erect ears with tip slightly curved inside, small and short chest pad and longer and softer hair.

CHAPTER-8
Dairy Development

D - 7 : Dairy Development

India is leading on top in the world for total milk production per year. Likewise, Gujarat is also leading state for milk production in the country. “Amul” pattern is well known and accepted by all the states in our country and some of the other countries also. Milk procurement by co-operative movement is basic theme in our state. At village level **20968** Milk Co-operative Societies, **115** Chilling centers and **20** Dairy processing units at **22** district level (Dairy) are in functioning in the state. They collected total of **241.60** Lakh Kg milk and process, State government has given full support to Dairy Development through Dairy Co-operation movement.

14 (Fourteen) Districts Co-operative Union have established Cattle Feed Factories to produces and supply cattle feed to members at village level at no profit no loss basis. Total production of cattle feed is **6883.95 M.T.** by **Fourteen** cattle feed factories.

22 (Twenty-Two) Co-operative Dairy Unions have total **309.00 LLPD** milk processing capacity and they produced **241.60** LKPD milk in the year 2023-24. These 22 dairy unions have **115** chilling centers also having capacity of **104.15** LLPD milk.

State government has made provision of **Rs. 67.71 Cr.** for Dairy development under the Animal Husbandry department during the financial year: 2023-24 which included Cattle Feed supplement and Dudhghar/Godown construction and dairy development.

CHAPTER-9
Fodder Development

D - 8 : Fodder Development

Irrespective of the best genetically potential and better management, if nutritional (feeding) aspect of livestock is overlooked; the optimum level of production is not achieved. Moreover, when feed and fodder account for more than 70% cost of milk production and as green fodder has very important and inevitable role in Milk production, it necessitates today more emphasis on fodder development programs.

Now a day, due to increasing human population burden and fast industrialization, land under fodder cultivation is decreasing which compels to grow more fodder per unit of land which can be done only by adopting latest high producing improved variety of fodder seeds by livestock owners. So in order to increase fodder production, encouraging farmers for growing improved varieties of high yielding fodder crops, making them well conversant regarding fodder conservation and its better utilization, improving pastureland, State Animal Husbandry Department is implementing various fodder development schemes.

Schemes

1 Supply of Minikits :

With the aim to widespread publicity and adoption of varieties of fodder crops, fodder mini kits for demonstrations are distributed to livestock owners through District Panchayat, Intensive Cattle Development Programmes of the states.

2 Assistance to Purchase Power Driven Chaff Cutter:

For purchasing of Power Driven Chaff Cutter for the better utilization of fodder, 75% subsidy (Max. Rs.18000/- of purchase cost) given to livestock owner for purchase of Power Driven Chaff Cutter.

3 Fodder Farms :

Round the year availability of green fodder at a reasonable price to the livestock owners – No Profit and No Loss basis. Department runs Six Village Fodder Production Farms, which also helps as a demonstration unit to the areas.

4 Establishment Of Fodder Seed Production Farms :

Fodder crops are always shy seeders. Generally all farmers growing green fodder do not go for fodder seed production. Which creates short fall between the requirement and availability and of fodder seed in general. To some extent it caters the need of fodder seed requirement. Department has established the fodder seed production farms in different region of the state. These farms also serve as demonstration purpose to nearby farmers about the fodder seed production practices. State Animal Husbandry Department is running two fodder seed production farms.

They are at -

(i) Mota Jampura, Dist.-Banaskantha

(ii) Bhutwad, Dist-Rajkot.

5 Cattle Shed for Cattle : (₹ 30,000/- for 2 Animals) :

Generally, it is seen that, poor livestock owner has no facility to tie and protect their milch animals due to lack of cattle shed. They are also in need of house for their own family but due to

lack of money this facility is not available with them. Those poor people are keeping their milch animal under tree or in the shadow of house or in open space. By keeping milch animals in open space protection from cold and hot weather rain is not available. It badly affects on milk production, health and resistance power of the milch animal. Poor people do not get expected production from milch animals due to lack of cattle shed and poor health condition of the milch animals.

Milch animals gets affected with so many diseases due to lack of resistance power without cattle shed and manger cattle feed also gets spoiled and fodder wastages goes up to 20% and more, so milk production cost goes on higher side. To overcome above difficulties to dairy husbandry in scheduled cast and other general category family implementation of assistance scheme for cattle shed, feeding trough, water tank and 7 litre steel bucket is started. 75% assistance of expenditure or ₹ 30,000/- for 2 Animals, maximum given these people.

6 Centrally Sponsored National Livestock Mission :

National Livestock Mission new guideline was published during July 2021. The revised scheme of National Livestock Mission (NLM) aim towards employments generation, entrepreneurship development, increased in per animal productivity and thus targeting increased production of meat, goat milk, egg and wool under the umbrella scheme Development Programme.

In which there are two mains components under sub Mission on feed and fodder development.

I. Assistance for quality fodder seed production

II. Entrepreneurship activities in feed and fodder

To avail the benefits of this scheme has to apply on the government of India website: http://nlm.udyamimitra.in

7 Assistance for NMSA Silo pit:-

Under NMSA (National Mission for Sustainable Agriculture), assistance for making silo pit is given the amount of subsidy is Rs. 1.25 lacs per silo pit. The beneficiary has to construct silo pit and has to purchase a power-driven chaff cutter.

CHAPTER-10
Estimates of Major Livestock Products & EDP Work

D - 9 : Estimates of Major Livestock Products and E D P Work

The Directorate of Animal Husbandry Gujarat State is conducting Integrated Sample Survey (ISS) since 1977-78. This survey is conducted round the year basis to estimate the annual production of major livestock products viz. Milk, Eggs, & Wool. The survey (ISS) has been further strengthened since 1983-84 so as to obtain district level estimates of major livestock products.

The survey is being conducted according to the guidelines provided by Indian Agricultural statistics Research Institutes (IASRI), New Delhi. The survey provides estimates of population as well as products in respect of Indigenous Cow, Cross breed Cow, Buffalo, Goat, Sheep and Deshi - improved layers.

For conducting survey (ISS) the whole state has been divided into 33 Districts called stratum. 15% of selection including villages and urban wards are selected randomly every year from each stratum. From the selected villages and wards in each stratum, 8-villages plus 2-Uraban wards per each district are selected in each of three seasons every year for detailed management study. The remaining selected villages form large sample where in listing is carried out only for population part.

The detailed management study over and above population of livestock products also includes feeding practices, dung productions and utilization, lactation/calving period etc. observed in the selected house hold/farms during each round. The household/farms are selected as per the new pattern prescribed by IASRI, New Delhi. The fieldwork is carried out by the field investigators specially trained in this regard under the supervision and guidelines of technical officers of the Directorate of Animal Husbandry. Entire procedure is carried out in two sub sample. i.e. Sub Sample-1 and Sub Sample-2.

The data is collected in the prescribed schedules in four monthly rounds in each season. ICAR-IASRI and Department of Animal Husbandry and Dairying, Government of India have developed an android application eLISS with ISS Portal for conducting this survey accurately with effective monitoring at each level. State wise 4 step model i.e. State Nodal officer, District Nodal officer, Supervisor and Enumerator are assigned to complete the task. This helps in bringing up progressive estimates of aggregates and also takes care of seasonality.

The tabulation and analysis of data is carried by Statistical and Research assistants under the guidance of Field Officer, Research Officer, Deputy Director (Survey), Deputy Director (Statistics) and Joint director (Statistics).

Detailed survey report on estimates of major livestock products is prepared and published every year by the Statistical branch of the Department. Some of the major finding of the survey results is presented in the table followed.

The computer facility was available in this department from the year: 1988-89.At present, various branches carry out their activities through computerization which are stated as per below :

(1) Selection of villages for sample survey using ISS Portal.

(2) Standard error of estimates of Major Livestock Products by using statistical formulas.

(3) Pay-roll System of head office employees.

(4) Analyzing milk yield competition at State level and National level.

(5) Monthly progress report of Epidemiology to be sent to the Central Government.

(6) Existing equipment record.

(7) Publications like Bulletin of Animal Husbandry and Dairying Statistics , Telephone Directory, Survey Report on Estimates of Major Livestock Products, Location register etc.

(8) Coordinating procurement procedure for computers and software with planning branch including compilation of indent from field officer, proposals preparation and coordinating meetings for same.

(9) The software of technical report making online is successfully developed and it working from 2006. All centers providing monthly Technical report online. The Data available at District, Region and State level with 100% accuracy.

(10) Employment Record entry has also started online.

Besides Computerization, EDP Cell is providing statistical data of Animal Husbandry & Dairying Statistics through Annual Bulletin. A Web-site of "Animal Husbandry-Gujarat State" is also launched through "GUJARAT INFORMATICS LIMITED-GANDHINAGAR."

CHAPTER-13
Animal Husbandry Extension

D - 10 : Animal Husbandry Extension

A. LIVESTOCK EXHIBITION: -

:: Tarnetar Pashu Pradarshan Fair ::

Tarnetar Fair is having social importance and internationally very famous. Peoples from all the parts of State, Country and even from different parts of Countries of the World visit this fair and realize about our traditional fair.

From Year:2008 Animal Husbandry Department, Government of Gujarat is organizing the State level "Pashu Pradarshan Harifai" (Animal Exhibition Competition) event every year. In which Pedigreed elite livestock breeds of cow breeds viz Kankrej , Gir and buffalo breeds of Jafarabadi , Banni have participated in various events and prizes were given to the winners. It also provides best platform to farmers for exchange of knowledge regarding animal husbandry, purchase of livestock & true to breed character of our native livestock.

The Government State Level exhibition and competition of livestock show at Tarnetar was organized at Surendranagar in Tarnetar village during year: 2023-24. Also Banni – Livestock Fair was organized at Hodka during 4th and 5th November, 2023.

B. LIVESTOCK EXTENSION: -

:: Best Livestock keepers Award Function ::

Awards given to Best Livestock Keepers with goal that from the scientific methods of keeping Livestock, owners will learn how to keep livestock economically and earn more money from Animal Husbandry. This function will provide competitive atmosphere amongst Livestock owners of the state.

"Shreshth Pashupalak Puraskar" (The best livestock keepers award) have been distributed to the state level winners & District level winners in the state level program at National Forensic Science University, Gandhinagar on Dt.10/11/2023.

Livestock keepers got 496 awards at Taluka level and 66 awards at District level in two ranks in each level viz First, Second and 3 Livestock keepers got the

Award on that day of State Level in three rank viz; First, Second and third.

Activities of Animal Husbandry Extension work in year : 2023-24 :
